

HEALTH, SAFETY & ENVIRONMENT POLICY

Department of Petroleum engineering is fully committed to provide and maintain safe, healthy and clean working environment for the wellbeing of its students, employees and visitors.

Department aims to achieve highest level of HSE standards by developing and implementing strategies for eliminating workplace hazards that poses risk to Personnel health, Safety and Environment.

The efforts are to promote HSE culture in the department by providing awareness, training, instruction and supervision to our employees and students so that they can develop appropriate level of competency for responding to emergency events and take measure for environment protection.

Dr. Javed Haneef
Assistant Professor
Petroleum Engineering Department
