

STUDENT PARTICIPATION IN ADIPEC 2022

A student of Batch 2018 Mr. Ghulam Haider participated and presented his technical paper in the ADIPEC Exhibition and Conference held in Abu Dhabi, UAE during November 2022. The article was titled “An Intelligent Approach to Predict Minimum Miscibility Pressure of Injected CO₂-Oil System in Miscible Gas Flooding” and was a joint collaboration between the students and the faculty members of the Department. Sprint Oil & Gas Services for sponsoring his accommodation, NED Scholars for Registration & Visa and Petroleum Institute of Pakistan for the air travel tickets. This is undoubtedly a great act of kindness and support which these prestigious organizations have shown towards the student and enabled him to participate in the conference. Such steps ensure that students do not miss out on such opportunities to showcase their talent, and represent Pakistan and NED University of Engineering and Technology in international conferences and forums.
