

Guest Lecture on Future of Fossil Fuels & Climate Change by Mr. Sarmad Siddiqui

On 29th March 2022, SPE NED Student Chapter of Department of Petroleum engineering has arranged a guest lecture on Future of Fossil Fuels & Climate Change. The lecture was delivered by Mr. Sarmad Siddiqui, Head of field development and reservoir modelling of Pakistan Petroleum Limited. Mr. Sarmad Siddiqui in his speech presented the causes and the adverse impacts of climate change. He shared his views regarding climate change and its effect in the energy industry and future of fossil fuels in the global energy mix as well as explained Pakistan's objective to move towards clean energy by 2030. He also discussed the role of petroleum engineers in the transition of energy industry. Overall, the lecture was very interactive and informative and will help students to orient their career according to global challenges and needs.
